# OUR *Tria of Islands*

The Cayman Islands. Grand Cayman, Cayman Brac and Little Cayman, are located in the Western Caribbean about 150 miles south of Cuba, 167 miles northwest of Jamaica and 460 miles south of Miami, Florida.

**GRAND CAYMAN**, the largest of the three islands, has an area of about 76 square miles and is approximately 22 miles long with an average width of four miles. The island is low-lying, with the highest point about 72 feet above sea level in North Side.

## OUR NATIONAL SONG

"Beloved Isle Cayman", was written by the late Mrs. Leila Ross Shier in 1930. Regarded as the unofficial national song for many years, it became the official national song when the Cayman Islands Coat of Arms, Flag and National Song Law was passed in 1993.

## OUR NATIONAL FOLK SONG

"Munzie Boat" was written by the late Mrs. Julia Hydes. Munzie boat in the sound, boys munzie boat in the sound, when you talking bout blue squab head, blue squab heads all a-round. Lambert said to Bertie, boy give me a sol-dier head. Bertie said to Lambert, boy, all the squab is dead, Munzie boat in the sound, boys Munzie boat in the sound, when you talking bout blue squab head Blue squab heads all a-round.

**LITTLE CAYMAN** lies five miles west of Cayman Brac and is approximately ten miles long with an average width of just over a mile. It has an area of about 10 square miles. The island is low-lying with a few areas on the north shore rising about 63 feet above sea level.

**CAYMAN BRAC** lies about 89 miles northeast of Grand Cayman. It is about 12 miles long with an average width of 1.25 miles and has an area of about 14 square miles. Its terrain is the most spectacular of the three islands. The Bluff, a massive central limestone outcrop, rises steadily along the length of the island up to 153 feet above the sea at the eastern end.

# THE HISTORY OF THE Cayman Islands

## HOW THE CAYMAN ISLANDS GOT ITS NAME

The Cayman Islands was first sighted by European explorers on May 10, 1503, owing to a chance wind that blew Christopher Columbus' ship off course. On his fourth and final voyage to the New World, Columbus was en route to the island of Hispaniola (home to Haiti and the Dominican Republic) when his ship was thrust westward toward "two very small and low islands, full of tortoises (turtles), insomuch that they looked like little rocks, for which reason these islands were called Las Tortugas".

The two islands sighted were Cayman Brac and Little Cayman. A 1523 map showing all three islands gave them the name Lagartos, meaning alligators or large lizards, but by 1526 the name Caymanas was being used. It is derived from the Carib Indian word for the marine crocodile, which is now known to have lived on the islands. This name, or a variant, has been retained ever since. Thus the word eventually developed into Cayman and adding the word islands, we became the 'Cayman Islands'.

## WHO WERE THE FIRST INHABITANTS?

The first recorded English visitor who visited our shores was Sir Francis Drake in 1586. The first settlers were two settlers from the disbanded army of Oliver Cromwell who came in the late 1650's for the purpose of catching turtle. Isaac Bodden, the first recorded permanent inhabitant of the Cayman Islands, was born on Grand Cayman around 1700. A variety of people settled on the islands: pirates, refugees from the Spanish Inquisition, shipwrecked sailors and slaves.

The first recorded settlements were located on Little Cayman and Cayman Brac during 1833 - 1840. Other settlers moved to Grand Cayman as this offered them better protection from attack by the Spanish ships, since the settlers could hide in the woodlands when necessary. Likewise, on Grand Cayman there was more land to cultivate. As a result, the settlements of East End and Bodden Town were founded around the same time. The earliest population record of the Cayman Islands goes back to the year 1773 when it was estimated that a total of 450 persons lived on the islands.

### FLAG OF THE CAYMAN ISLANDS

The Cayman Islands flag, the official ensign, was adopted in 1959, shortly after, the coat of arms was adopted. There are two versions of the flag – the blue for use on land and the red for use at sea. These are based on the British blue and red ensigns.

ands

### COAT OF ARMS

The Cayman Islands coat of arms consists of a shield, a crested helm and a motto. Three green stars representing the islands are set in the lower two-thirds of the shield. The stars rest on blue and white wavy bands representing the sea. In the top third of the shield, against a red background, is a gold griffin "passant guardant" (walking with the further forepaw raised and the body seen from the side), representing Great Britain. Above the shield is a green turtle on a coil of rope. Behind the turtle is a gold pineapple. The turtle represents Cayman's seafaring history; the rope, its traditional thatchrope industry; and the pineapple, its ties with Jamaica. The islands' motto, "He hath founded it upon the seas", is printed at the bottom of the shield. This verse from Psalm 24:2 acknowledges Cayman's Christian heritage.

CAYMAN BRAC & LITTLE CAYMAN

# ISLAND HOPPING

TO OUR *Sister Islands*

## CAYMAN BRAC

The larger of the two Sister Islands, Cayman Brac caters to adventure-loving nature enthusiasts with its spectacular hiking trails and caves. Named for its breathtaking 153 ft bluff, the 14 square miles island affectionately known as the "Brac" is rugged, charming and filled with some of the Cayman Islands' most dramatic vistas and wildlife. Only a 30 minute plane ride from Grand Cayman, you'll feel as though you're worlds away on the serene shores of Cayman Brac.

## LITTLE CAYMAN

A day on the smallest island of all three, is an adventure in seclusion unlike anything else in the Caribbean. With fewer than 160 residents, most of the island is free of people and full of glistening white sand beaches that make your trip feel like a private island vacation. Though only 10 miles long and 1 mile wide, Little Cayman has all the makings of a perfect Caribbean vacation: beautiful luxury accommodations, white sand beaches, a welcoming and safe community, and more stunning scenery than visitors could ever imagine.

# DIVE *Cayman*

As one of the world's top dive destinations, it's all here in the Cayman Islands. Tranquil calm waters, 100 ft. + visibility. Pristine shallow reefs filled with schooling fish and small invertebrates. Breathtaking steep, deep walls adorned with sponges and corals in a stunning array of colours. Legendary wrecks featuring photogenic structures and curious marine residents. And there's also the World's Best 12 Foot Dive - Stingray City.

With the number of officially named dive sites in the Cayman Islands at 365, there are more reasons than ever to dive Cayman now.

## THREE ISLANDS TO CHOOSE FROM

Comprised of three unique islands – Grand Cayman, Cayman Brac, and Little Cayman – the Cayman Islands offers both the novice and the experienced some of the best diving and snorkelling in the world.

Each of the three islands is surrounded by a shallow, environmentally protected coral reef. Our secluded location, far from other land masses, is what keeps coral healthy and our waters clean and clear. The Cayman Islands offers the most spectacular wall diving in the Caribbean partly because the islands are actually on the top of submerged mountains.

## PIONEERS OF RECREATIONAL DIVING

The Cayman Islands is historically recognised as a pioneer of recreational diving through the establishment of one of the Caribbean's first dive operation on Grand Cayman in 1957.

The Cayman Islands has justifiably earned the coveted distinction as being among the most magnificent dive locations in the world. Our underwater world has an abundant marine life, vibrantly coloured reefs and dramatic walls less than a quarter mile off shore.

## DIVERSE RANGE OF UNDERWATER ACTIVITIES

The Cayman Islands offers a wide range of scuba diving activities including vertical walls plummeting to depths of 2,500 ft, ship wrecks, colourful reefs, shore and technical diving. With water temperatures of 80 degrees year round, this makes the destination a diver's paradise. You can even rent dive propulsion vehicles (DPVs) and see more of your favourite dive sites in one dive.

Further adding to its convenience, many hotels, resorts and villas are within 15 minutes distance from the airport, allowing guests to cosy into a beach chair and take in the incredible views of the turquoise Caribbean Sea right on the heels of their arrival.

### INFRASTRUCTURE/FACILITIES | Outstanding Sports Venues

The Cayman Islands' exceptional sporting venues and supporting infrastructure continue to capture the attention of internationally-recognised sports talent, from Olympic athletes to National Football League players, who travel from all over the globe to participate in sporting events and tournaments year-round. Among one of the destination's most impressive facilities is the Truman Bodden Sports Complex, a multi-use facility with a 6-lane, 25-metre swimming pool, full-purpose track and field with a 3,000-seat stadium, and basketball/netball courts.

For sports enthusiasts or professional athletes who visit for leisure or to participate in one of the Cayman Islands' annual sports events, there are several chiropractic clinics available, along with a broad-range of sophisticated medical services to choose from, including specialty clinics and large public and private hospitals.

WILDLIFE

10

*Amazing things*  
you never knew  
about the  
Cayman Islands  
and its wildlife.

## ONE

The Cayman Islands are part of a mountain range called the Cayman Ridge, which rises more than 7,500m – or the size of a very large mountain in the Himalayas – from the ocean floor. The abyss known as the Cayman Trench is very deep and home to the hottest hydrothermal vents in the world. These are cracks in the seabed from which superheated water, up to 450°C emerges. Unique life forms live here, including a species of eyeless shrimp that has a light-sensing organ on its back. Having said that, the highest point above sea level is near the east end of Cayman Brac – and that's just 46.6m.

## TWO

There are no rivers in the Cayman Islands. As the islands are the peaks of a limestone mountain, and limestone is really porous, all the water just runs through it rather than off it. This lack of 'run-off' means that the visibility in the sea is exceptional and makes Cayman one of the world's top diving locations.

## THREE

There are many parrotfish in the Cayman Islands and what's interesting about parrotfish, apart from the fact that they can go from being male to being female and back again, is that they excrete sand. They munch on rock and coral, and it comes out as sand. Which is why there are so many great beaches on the islands.

## FOUR

Cayman has its very own blue dragon, an iguana found nowhere else in the world which is incredibly rare and really is blue. It is estimated there were about a dozen of these amazing beasts remaining in 2002, making it 'Functionally Extinct' but thanks to an extensive breeding programme in Grand Cayman the blues are back in force. In 2012 over seven hundred were counted, taking the species off the ICUN Red List as 'Critically Endangered', they are now classified as 'Endangered' and are prevalent enough to be spotted, you can even walk right up to them.

## FIVE

In the middle of North Sound on Grand Cayman, wild Southern stingrays gather in huge numbers at a place called 'Stingray City'. You can get in the water with them, and meet them personally, your boat captain will even be able to tell you some of their adopted 'names'.

## SIX

The Cayman Islands are home to three sea turtle species: the green, the loggerhead, and the hawksbill. Green and loggerhead turtles nest on beaches all around the Cayman Islands, including Seven Mile Beach. From May to September, female turtles crawl up onto the beach to lay eggs in the sand, and from July to November the eggs hatch. Each nest produces about 100 baby sea turtles! Hawksbill turtles can be seen in Cayman waters while snorkelling or scuba diving. By the early 20th century, the Cayman turtle nesting population was nearly extinct, but due to conservation efforts, nesting numbers are now increasing each year.

## SEVEN

The only native land mammals of the Cayman Islands are bats. Some of them only eat fruit such as wild almonds and some only eat insects such as moths, beetles and mosquitoes. There's also the buffy flower bat, which is only found in the Caribbean and drinks nectar from flowers like a hummingbird.

## EIGHT

There are over 230 birds in the Cayman Islands. Little Cayman has the largest colony of red footed boobies in the Western Hemisphere. A close relative of the Atlantic gannet, these remarkable birds may fly up to 125km in a single day on a fishing trip, and then 125km back home again, and can be away for more than 12 hours.

## NINE

The Grand Cayman pygmy blue Brephidium exilis thompsoni is a Grand Cayman endemic subspecies of butterfly, found nowhere else in the world. It was first discovered in 1938 and was not found again until 1985, when two colonies were located on the north and west coasts.

## TEN

In a secret bay on Grand Cayman, one of only a dozen places worldwide, there exists the rare and magical phenomenon of bioluminescence. This extraordinary natural light show is caused by a high concentration of a particular species of plankton alongside red mangroves and minimal light movement in the sheltered water, resulting in a stunning bioluminescence light, best seen on very dark nights on a tour with companies specialising in bioluminescence tours.

This market has become the livelihood of many local farmers as they look forward to selling their products and sharing with their regular customers on a daily basis.

The Camana Bay Farmers & Artisans Market is a showcase for all that is grown and made in Cayman.

Held every Wednesday from 11am on The Paseo, visitors will discover an array of local purveyors offering products and experiences found only in Cayman. INTERNATIONAL FARE

**CULINARY**

*Grand Cayman*

#### DIVERSITY AND QUALITY

For those well travelled, the Cayman Islands is a destination long known for culinary excellence and divine dining experiences. This tiny trio of islands has over 200 restaurants, offering both locals and travellers great diversity, quality and selection when it comes to the dining scene.

#### CULINARY PEDIGREE

On Grand Cayman, as each sun-drenched day comes to a close, the scene clearly transitions from the waves lapping gently on Seven Mile Beach to thoughts of the delicious dining that can be found across the island. While the island is perhaps most well-known for its internationally acclaimed annual epicurean event in January, Cayman Cookout – the celebration and enjoyment of food is a local deep-seated tradition. Having earned the reputation as Culinary Capital of the Caribbean, the islands undoubtedly boast a culinary pedigree to be proud of.

#### CARIBBEAN CUISINE

Infused with the true taste of the Caribbean, nothing comes close to traditional treats such as fried fish and fritters, served up from a variety of laid-back and unique streetside locations.

As one would expect from an island, fresh fish and seafood abound and can be found all over the island, expertly prepared by a range of beachside cafés. On any given day the selection typically includes snapper, mahi-mahi, wahoo, and grouper, or whatever the local fishermen have on display. As is customary with Caribbean cuisine, the fish is seasoned with local herbs and spices and grilled or fried to finger-licking perfection. Served with fritters, a traditional type of fried bread, the tasty morsels are often accompanied with local produce such as plantain or breadfruit. Tradition has it that Sunday wouldn't be Sunday without fish 'n' fritters. A favourite of the locals is Grape Tree Café in Bodden Town or Captain Herman in East End.

#### CAYMAN INSPIRED. LOCALLY SOURCED.

The movement to bring the freshest produce and finest ingredients straight to hungry patrons is evident in the menus and kitchens of several restaurants in the Cayman Islands. With fertile and free-range farms supplying establishments with a broad array of locally grown vegetables and meats.

# CULINARY *Excellence*

## FARM TO TABLE EXPERIENCE

The Brasserie has been a pioneer of the farm to table movement in the Cayman Islands for years. The restaurant and its adjacent market, source most of their produce from a large kitchen garden out back, while also maintaining strong connections with farms across the island for other products.

The Brasserie isn't alone in its efforts to connect food to fork. Southwest Collective, The Greenhouse, Jessie's Juice Bar and Cayman Cabana also create menus that are based on what is locally available. Southwest Collective calls itself a "cafe/bar with a difference." By focusing on good ingredients and simple foods, this casual George Town spot is a go-to for great food and a great time.

Jessie's Juice Bar, by comparison, offers fresh juices and smoothies that change with the season, and sells baked goods that cater to gluten-free.

Whether you're a restaurateur, an avid foodie or a supporter of the local food movement, the Cayman Islands has a host of options for those in search of a healthy and authentic food experience and vegan diets. The Greenhouse located in the heart of West Bay is an environmentally-conscious cafe with a menu that offers gluten-free or paleo-friendly options.

Cayman Cabana located on the waterfront in George Town is doing something really special and unique as they collaborate with local farmers and fishermen to host a Thursday weekly "Oceanside farm to table dinner series". It is authentic, true to its name and heritage, culinary intimate and absolutely delectable.

On the other side of the farm to table trend is Plantation Organics, a two-acre farm in the lower valley district of Grand Cayman that grows 400 types of organic fruits, nuts, spices, vegetables and herbs. The farm also hosts "Garden-to-Gathering" events, where a garden tour is followed by a farm to table dinner made by a local chef.

Whether you're a restaurateur, an avid foodie or a supporter of the local food movement, the Cayman Islands has a host of options for those in search of a healthy and authentic food experience.

# Café Amazon

## GRAND CAYMAN

The trend of eating healthy and ensuring foods that you eat are non-GMO or Organic has expanded to the corners of the Caribbean. Some may think that everything in the Caribbean must be organic but in many countries within the Caribbean that is not the case. Cayman for example is heavily dependent on trade with international markets and for seasons where the weather is bad and ships can't come in to bring food and supplies, you definitely see the results within the supermarket.

But the culinary capital of the Caribbean has been seeing a very nice trend where more and more local farmers are dabbling in the area of organic provisions. The owners of Cayman Organic though has taken it a step further and is now proudly the only certified organic farm in the Cayman Islands.

The 1.2 acre farm started its humble beginnings in 2011 and is now used to supply several restaurants and locals with organic produce. In 2016, Cayman Organic became a member of the Organic Trade Association. They are the first member of the OTA from Cayman. The members work together through networking, advocacy and other initiatives to encourage and protect organic farming practices and to share messages about the positive environment and nutritional attributes of organic products with consumers, the media and policy makers.

**In your restaurant, Café Amazon, we have not only tasted many items on your delicious menu but have experienced some of your amazing sauces and drinks.**

We enjoy making products out of our organic ingredients and many have become big hits including our scotch bonnet pepper sauce, sorrel (drink), sorrel ginger salad dressing and life bread.

We sat down with the family and had an amazing tour of their farm.

**Why did you start this project?**

The family became very aware of the dangers of commercially grown produce on human health and the environment and wanted to make a difference in our own lives. After a while, we wanted to share this experience as well with friends, family members and the wider community.

**What type of produce do you grow at the farm?**

Like any other farm, produce grown is very seasonal. We grow pumpkin, watermelon, carrots, kale, broccoli, cauliflower, okra, green beans, papaya, bananas, mangoes, limes, peppers, arugula, herbs and sweet potatoes for example that is very prevalent to the Caribbean region but we also grow many things that are not normally grown. An example is eggplant, squash, sunflower seeds and even oats.

**Is there a demand for organic products on island?**

Yes! There is definitely a high demand for organic produce in Cayman as residents are becoming more and more aware of the dangers of chemicals used in commercially grown produce. The demand is greater than what our farm can produce but the upside is that there are about 2 other organic farms on the island.

# ADVENTUROUS *Cayman Brac*

Adrenaline-inducing. Both above our shimmering aquamarine seas and below. At every turn, a new thrill to be discovered. Dramatic jagged bluffs. Sheer cliffs. Hidden caves and verdant forests. A landscape sculpted into unexpected vistas over time, with abundant flora and fauna. A diver's mecca. A bird watcher's dream. Cobalt waters teeming with fish. A land of startling contrasts. Fueling your passion for adventure. Cayman Brac. An island getaway unlike any other. Where good times come naturally.

# CAYMAN BRAC

## Things to Do

### THE BLUFF

The Bluff commences at the West End of the island and extends throughout the rest of the island down to Spot Bay. It is the highest point on this island as well as throughout the Cayman trio. On the Bluff there are literally hundreds of caves of all sizes. In the caves are bats and other living creatures.

### CAYMAN BRAC LIGHTHOUSE

From the Parrot Reserve, continue travelling on Major Donald Drive east to the Lighthouse, located at the end of the road - there are actually two lighthouses at this point; a historic lighthouse and a newer model. Both are just lights atop tall towers but the view from this area is dramatic. What makes the view dramatic is the 153-foot-high Bluff, the highest point in the Cayman Islands. A trail weaves its way to the edge of the Bluff and provides excellent photo opportunities. Rocky paths snake their way along the Bluff; wear hiking boots for this challenge.

### CAYMAN BRAC MUSEUM

The front room of the museum pays homage to the building's past iterations. Moving throughout the museum, visitors will encounter a collection of dental pliers of old, a scale model of a catboat, and exhibits discussing the history of ship building, turtling, destructive weather, and old-time living.

### CHRISTOPHER COLUMBUS GARDENS

Located on the Bluff, the park is home to the Wall of Honour, several boardwalks and gazebos constructed to fit in with the natural surroundings. The Wall of Honour, has the names of 500 persons who have made a significant contribution to Cayman Brac and Little Cayman over its 500 year history.

Le Soleil d'Or Restaurant

## WRECK OF THE RUSSIAN FRIGATE (MV CAPT. KEITH TIBBETTS)

The relatively young wreck dive is the famous MV Captain Keith Tibbetts, a huge 330 foot long Russian Brigadier Type II Class frigate that was scuttled in the north shore of Cayman Brac in September 1996. The Keith Tibbetts is a great dive and one of the few Soviet Union wrecks in the Western Hemisphere.

## NATURE CAYMAN

# Le Soleil D'or

## CAYMAN BRAC

Cayman Brac, the second largest of the three Cayman Islands, boasts a plethora of fauna and flora, scenic views, caving systems and an intriguing limestone rock formation called the Bluff in the middle of the island.

There are a variety of hidden gems that can be found and explored in Cayman Brac. In 2010, the birth of a new idea was formed on its rocky shores. Le Soleil d'Or (The Golden Sun), is a beautiful hidden gem in Cayman Brac that is the only beachside farm and sea to table property in the Cayman Islands.

There are several great reasons why Le Soleil d'Or is a hidden gem.

### THE GEM

The Golden Sun farm located on the property is hard to miss and worth the tour. Guests can request a personal tour of the 20 acres of land and see for themselves where their farm to table meal is being grown. The amazing reality of the farm is that not only local fruits and vegetables are growing, but also items that are not known to be grown in the Caribbean region such as olives, dragon fruit and eggplant.

### THE TREASURE

The island of Cayman Brac, due to its limestone rock formation, has several sink holes. Unique though on this property is a shrimp hole (one of two on the whole island). Not eatable, but a great spot to relax and enjoy the additional water feature implemented.

### ROMANCE

The property boasts several accommodation offerings, but the Golden Sun Cottage is the perfect hideaway for honeymooners and couples celebrating anniversaries. A very secluded hideaway with a private pool, guests can take advantage of freshly squeezed juices and homemade cookies upon arrival, as well as homemade yogurt and a fresh basket of fruits.

### FOODIES

For foodies (or those that would love to join the craze), Le Soleil offers private cooking lessons. Options include delicious brick oven pizzas, pastas and more.

### UNDER THE CARIBBEAN SUN

The European Courtyard, beautiful in its design, allows guests to relax and indulge in freshly baked pastries and brewed coffee. Cigars anyone? Check out their cigar bar on property.

### HEALTHY LIFESTYLE

Maintaining a healthy lifestyle on vacation and especially while in the Caribbean can be a bit more challenging. So for the health conscious guests wanting to remain active while on vacation, they will find that the property boasts a basketball ball and tennis court, gym and Pilates studio, as well as a spa.

If you want an adrenaline rush, the property also offers jet skis and fishing opportunities.

### MOMENTOS

The farm produces organic and locally made products for guests. Freshly made bread, delicious ice creams, jams, sauces, soaps and a variety of other products cannot only be found on the menus and rooms, but also in the store if you want to take a piece of Cayman Brac home with you.

### EUROPEAN INFLUENCE

A first for the destination, the spacious layout of this property and beautiful minds of this team has brought into existence their very own charcuterie.

# Delax

### MIXOLOGISTS

Their signature drinks are amazing concoctions and all very healthy. Mixed from organic fruits and vegetables, they are freshly made daily with no sugar added. Their cherry, lemon and basil drink is a must have!

# THE Sister Islands OF THE CAYMAN ISLANDS

Booby Bird, Little Cayman

## CAYMAN BRAC

Beneath the cobalt blue waters that surround this charming island, you will find a colourful array of aquatic life. It is believed that hidden treasure still rests below the wrecks and hidden crevices. But not to be played down by the phenomenal underwater attraction we possess, is the topside activities and amenities available to anyone who visits our shores.

Cayman Brac is the most easterly of the three islands. With a total land mass of 14 square miles, the island is small enough to maintain a peaceful, tranquil atmosphere, but big enough to have a plethora of hidden caves, winding trails and a unique cultural history.

Booby Pond, Little Cayman

## LITTLE CAYMAN

Tucked away in the exotic arena of the Caribbean is a magical island that make up the island trio of the Cayman Islands known as Little Cayman.

Little Cayman consists of 10 square miles of unspoiled surroundings, including more than a dozen secluded beaches, numerous lagoons, mangrove forests, salt ponds and tropical forests strewn with orchids.

It is home to many indigenous species of flora and fauna.

We invite you to come and relax with us on this serene tropical paradise.

## HERITAGE

# TRANQUIL

# *Little Cayman*

Feel your tensions ebb away as the sultry Caribbean breeze caresses your skin. The turquoise sea, unimaginably blue, sparkling brilliantly next to powdery white sand beaches. Dive our legendary sites. Go bird watching, hiking, beachcombing, fishing, snorkelling or simply laze the day away in a hammock beneath a palm tree. So many delectable temptations. So much to savour on this tiny island treasure. Small yet utterly spectacular. Little Cayman. Here, you can truly relax in body and soul.

# LITTLE CAYMAN

## Things to Do

### POINT O' SAND

Grab a picnic basket, your favourite drinks and make a day of it at this astoundingly beautiful and quiet beach. The depth of the water stays ankle deep for just over 15 feet then gradually drops off making it an ideal beach for basking in the sun while staying cool.

### LITTLE CAYMAN MUSEUM

Like the larger sister islands, Cayman Brac and Grand Cayman, Little Cayman also has its own museum. Come step back in time as you learn about the work, hobbies, and the life of the people who lived on Little Cayman so many years ago. Admission Free.

### LITTLE CAYMAN NATIONAL TRUST HOUSE

This traditional Caymanian cottage overlooks the Booby Pond Nature Reserve. Telescopes on the breezy second-floor deck permit close-up views of their markings and nests, as well as the other feathered friends. Inside you'll find shell collections, panels and dioramas discussing endemic reptiles, models "in flight," and diagrams on the growth and life span of red-footed boobies, frigate birds, egrets, and other island "residents." The shop sells exquisite jewellery made from Caymanite and spider-crab shells, extraordinary duck decoys and driftwood carvings, and great books on history, ornithology, and geology.

### BLOSSOM VILLAGE

This area on Little Cayman is probably the area that was inhabited by some of the first settlers. It was and still is the main town on this island. Blossom Village is home to the Quincentennial Monument that was erected in honour of brave Little Caymainans who dedicated their lives to service to country. These brave men and women helped to put Little Cayman on the map.

# OWEN ISLAND

For a real adventure and a true taste of Cayman watersports, visit the island getaway Owen Island, a small islet just off the south-western coast of Little Cayman. The only way to reach the island is by sailboat or kayaking across the waters of Bloody Bay, so be prepared for an exciting voyage! If you love the idea of a Caribbean island getaway to a secluded beach for the ultimate in romance, rest, and relaxation, Owen Island is the vacation for you.

# BOOBY POND

Colony of 20,000 red-footed booby (the largest in the Caribbean) and 350 magnificent frigatebirds; major breeding and overwintering site for herons, shorebirds, waders and ducks, including the endemic West Indian whistling-duck. Owned and protected by the National Trust, it is a RAMSAR site and a wetland of international importance.

## CENTRAL CARIBBEAN MARINE INSTITUTE (CCMI)

The Central Caribbean Marine Institute (CCMI) is the region's only research and education facility committed to studying and protecting the world's coral reefs. CCMI was established in 1998 by Dr. Carrie Manfrino to protect the future of coral reefs through research, conservation and education.

The Little Cayman Research Centre was built in 2005, after a celebratory ground breaking by His Royal Highness, The Earl of Wessex, Royal Patron to CCMI in 2003. Prince Edward and his wife The Countess of Wessex have since visited CCMI in Little Cayman on several occasions, most recently in March 2016 to lend their support and raise awareness about the incredible achievements and work done by the organisation.

During his latest visit, His Royal Highness spoke of the reasons why he was so interested in CCMI and their work: "Declining coral reefs pose urgent threats to society and indeed, to the economy of entire island nations. The Central Caribbean Marine Institute is one of the premier research institutes that is working to reduce this disastrous decline and to save coral reefs around the globe," he said.

Since conservation and education go hand-in-hand, CCMI launched its Ocean Literacy project in 2007, which aims to ensure that all children in the Cayman Islands are ocean literate by the time they are 12 years old. Since the inception of the programme, thousands of school-aged children in Cayman have participated in their programmes.
